

Steam generator SteamTec Classic

A high performance steam generator for public use.
The generator can be used in:

- Steam rooms (with optional min. 1 1/4" steam outlet)
- "Soft steam" sauna cabins in combination with a sauna stove (e.g. 34.G model).
- Requires an external control panel
- Main operation states are shown through pilot LED lights
- Automatic cleaning and descaling (requires optional descaler, produces app. 5 l waste water).
- Wall-mounting installation, all connection at the bottom.

For planning, installation, operating and servicing please refer to the installation and operation guide.
